

Professional Summary:

Dynamic and Results-oriented Java Developer with one year of hands-on experience and a solid foundation as an Oracle Certified Java SE8 Programmer. Skilled in SQL log analysis, C business functions, and BI Publisher. Eager to leverage programming expertise and Oracle experience in a Java Developer role. Seeking an opportunity to contribute technical expertise and passion for software development in a dynamic team environment.

Experience:

Company: Deloitte Consulting LLP**1. Java Developer**

As a Java Developer, I was responsible for the development, customizations. Proven ability to analyze user needs and develop effective and efficient coding solutions. Expertise in object-oriented design, data structures, and algorithms. Strong organizational skills and the ability to adhere to coding and quality standards.

Key Achievements and Contributions:

- Collaborated with cross-functional teams to analyze requirements, design, and implement robust and scalable Java applications.
- Worked with database technologies, including Oracle, to store and retrieve data efficiently, ensuring data integrity and system performance.
- Planned, tracked, and managed deliverables on short-term sprints and long-term software deployments,
- Created detailed design documentation, unit test plans and well-documented code.
- Learned company standard of application software development, agile and iterative development methodologies.
- Played a key role in the adoption of Agile methodologies, contributing to faster and more adaptive project delivery.

Skills:

- Java, SQL, XML
- Web programming (HTML, CSS, JavaScript)
- Object-oriented programming, Data structures and algorithms
- Unit testing, Debugging.
- Analyzed and resolved technical issues.
- Adhered to coding and quality standards.

2. JDE Technical Developer

Here my primary focus was on enhancing the functionality and performance of the JDE Object such as reports, application to meet the specific requirements of the company.

Key Achievements and Contributions:

- Customization and Development: During my tenure, I successfully implemented several customizations and developed new functionalities. This involved understanding the business requirements, designing, and implementing solutions, and testing them to ensure they met the expectation.

- Report Development: I have developed various operational and analytical reports and understand the standard C business function for tax functionality and developed custom tax changes in report.
- Troubleshooting and Issue Resolution: This involved troubleshooting technical problems, analyzing the logs and provide the solution to solve the problem. Optimizing the report running time.
- Documentation: I maintained detailed technical documentation for all the customizations, and reports developed.

Skills:

Troubleshooting and Debugging, Documentation and Technical Writing, Worked on XML, XSL, and RTF templates, and BI Publisher.

Education

Fergusson College Pune

Bachelor of Computer Sciences BSc (CS) – CGPA: 9.94

June 2019 - June 2022

DBF Dayanand College Solapur

SSC – 90 per | HSC – 83 per

Soft Skills:

- Strong organizational and prioritizing skills with high level attention to detail.
- Excellent communication skills with an ability to explain plans and activities clearly and concisely.
